

Community Consolidated School District 146 Staff Use of Internet

District 146 continues to make a significant commitment to technology and its educational uses. Included in this is an opportunity for staff to use computer networking, have Internet access and electronic mail. This access may extend beyond the school setting to individual home computers. Because of this access, all use of these resources must be in support of education and research as it relates to the policies and **TECHNOLOGY USE GUIDELINES** of School District #146. Therefore, such activities as using these resources for commercial gain, transmission of objectionable material, or excessive personal use of e-mail are prohibited. All users of the network are expected to exercise responsible behavior when using these district resources.

If you choose to use an Internet connection for personal use, you are expected to gain access through a commercial provider.

Any violation of these privileges will result in disciplinary action.

I have read and understand the above and agree to use district resources only as they relate to district educational practices. I further understand that any misuse or violation of these resources will result in disciplinary action.
