

CODING FOR KIDS CODE WITHOUT A COMPUTER FRIDAYS 9/8 - 9/29 4:30 - 5:30PM

STEM FOR AGES 4-7

When we think about helping kids learn computer coding, we automatically think we need a computer first. But in fact, there are many ways to learn computer coding without a computer. Many thinking and coding approach can be learned in different activities off-screen.

Coding for Kids will introduce our youngest engineers to fundamental concepts of coding without the use of a computer. Through fun activities kids will learn logical thinking and basic programming steps.

Students will:

- Learn to break a big task into smaller actionable steps
- Apply abstract thinking skill by using a symbol to represent something
- Use a coding game for critical thinking
- Take some input and do something with it
- Play the "if...then" game
